### DETAILED ACTION

1. Claims 2-4,7-9,12-14, and 17-19 have been cancelled.
2. Claims 1,6,11, and 16 have been amended.
3. Claims 1,5-6,10-11,15-16, and 20 are pending.

### *Response to Arguments*

4. Applicant's arguments filed 14 December 2005 have been fully considered and they are persuasive.

### *Allowable Subject Matter*

5. **Claims 1,5-6,10-11,15-16, and 20** are allowed.
6. The following is an examiner's statement of reasons for allowance: The present invention is directed towards a method and system for securing login to a user by identifying a user to login and validating the user access privileges, allowing the user to enter the secure system if the user access privileges are valid. Each independent claim identifies the uniquely distinct features "**accessing user access privileges by using a component permission class that is located in a system framework**". The closest prior art, Haun et al. (US Patent No. 6,751,658) discloses a method and apparatus are described for providing a reliable and maintainable operating system in a net-booted environment, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.
7. Therefore, **claims 1,6,11, and 16** and the respective **dependent claims 5,10,15, and 20** are in condition for allowance.

### ***Conclusion***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
